## PolyTuff Systems, International Introduction

Polytuff Systems, International functions in association with the 30 year old company American Polymers Corporation.

We provide fully warranted products to the waterproofing, architectural and decking industries. Architectural Manuals are presented to acquaint and assist you with the preparation, specifications and usage of our products. We are a manufacturing, marketing and professional sales team representing the very best and unique state of the industry in Water Curable Elastomeric Coating Technologies, plural component polyureas, polyaspartic and sealant technology.

In the ever changing challenges of today's coating needs, we have developed environmentally friendly, solvent and T.D.I. free, high performance products for the commercial and institutional markets. Our products are available through a national network of distributors and representatives and installed by manufacturer trained contractors and applicators, all of whom are backed by our in-house technical sales support group. Specify with confidence, knowing you do so with the very best.

The cutting edge technologies supplied by PolyTuff Systems, International are outstanding in supplying one of the easiest and fastest processes for complaint free coatings and sealants in the industry. PolyTuff deck coatings allow the contractor to correct negative slopes and change them to positive slope to drain in one (1) day. Most of the PSI advanced water-curable technology allows for the complete system to be installed in one day, applied at any thickness. A vast range of aesthetic finishes beyond any in the industry are available, combining both the flexibility of the water-curable urethane membranes and the cementitious decorative finishes of faux tile, stained concrete and stamped concrete along with the capability of real tile, slate and marble finishes.

PSI is constantly devoted to process improvement in plant and the education and means of installation by the contractor in the effort of making our products complaint free as possible. Full time Technical Service Representatives work with the contractors, free of charge, in the field to make them the best trained and skilled contractors possible.

PolyTuff Systems, International in association with American Polymers, inventors of water curable urethane technology has manufactured under private label name brand "Tuff-Flex" water curable urethane with deck systems that exist for over 20 years.

Spanning three decades, American Polymers has been a leading manufacturer of high performance Polyurethane and Polyurea coatings. This pioneering technology and innovation has resulted in some of the most well respected coating systems in the industry. With our unmatched R&D, stream-lined manufacturing plant and quality control,

we market a wide variety of proprietary single component, plural component, aromatic, aliphatic polyurethane/polyurea coatings and complete coating systems to protect and waterproof many different types of substrates from the gamut of harsh environmental and service conditions.

PSI has now introduced the advanced technology of non-gassing, non-yellowing, Hydrophilic sealants that allows the contractor to seal caulk and seal joints in what was once previously considered hydrophobic conditions.

PolyTuff Systems, International is pleased to offer jobsite assistance, free of charge. PolyTuff Systems, International is proud of its success and track record in the industry. When you have a PolyTuff product installed on your project, you can be assured it is being installed by a professionally trained contractor, with one of the finest sales and technical support teams in the industry.

Sincerely,

*Bob Clanton*
