P-TUFF® BDM
Spray Applied Deck Waterproofing

1.01 DESCRIPTION
P-Tuff® BDM is a spray-on, seamless, waterproofing membrane for Highway and Railroad Bridge Decks is a fast setting, seamless and joint free coating system made from a rapid-curing, 100% solids, flexible, aromatic, two component, spray polyurea which can be applied to suitably prepared concrete and metal surfaces. Extremely fast gel time makes it suitable for applications down to -20°F (-29°C). Apply to carbon or mild steel metals without primer. VOC compliant in all states and provinces in North America.

1.02 USES
- Airfield & Highway Pavement Repairs
- Bridge Decks and Ramps
- Rail Road Bridge Decks
- Highway Bridge Abutments
- Parking Structures
- Pedestrian Walkways
- Pier Caps
- Tunnels

1.03 FEATURES
- Accepts Thermal Movement without Crazing
- Applied to 5 Mils (125microns) Profile Steel Decks w/o Priming
- Certified Applicator Program
- Complies with "Buy America" Requirements
- Excellent Chemical Resistance
- Infrared Spectroscopy Used As Part Of Quality Control During Manufacture
- Installed With Or Without Reinforcement In Transitional Areas
- Interior Or Exterior Applications
- Low Odor
- Low Temperature Flexibility
- Low Vapor Transmission
- Made In America
- Meets Arema Cold Spray-Applied Waterproofing Requirements
- No Toxic Vapors, Odorless
- Non-Hybrid System
- Non-Reactive
- Seamless
- Seamless LapJoints
- Superior Crack-Bridging
- Thermal Stability
- Zero VOC (100% Solids)

1.04 TECHNICAL DATA
Meets: North American Ballast Test at 80 mils (2032 micons) for 2.0 million cycles.

1.05 PACKAGING
10-gallon kit: 5 gallon (18.9 liters) pail of Side-A and 5-gallon (18.9 liters) pail of Side-B
100-gallon kit: 50 gallon (189 liters) drum of Side-A and 50-gallon (189 liters) drum of Side-B

1.06 COLOR
Blue
Custom colors are available upon request. Minimum quantity applies, contact Poly-Tuff Systems International (PSI).
Due to its aromatic nature, P-Tuff® BDM will tend to yellow or darken in color and will become flat after exposure to UV light. P-Tuff® BDM may be top coated with an aliphatic polyurethane/ polyurea coating for a color-fast finish.

1.07 GENERAL
P-Tuff® BDM is extremely resistant to water vapor transmission and protects against moisture entrapment between P-Tuff® BDM and deck surfaces that could be susceptible to freeze-thaw degradation. It can be applied in extreme cold and elevated temperatures exceeding 170°F (77°C) surpassing the limitation of 104°F (40°C) of both MMA and urethane membranes. P-Tuff® BDM can be used in conjunction with hot asphalt overlays to provide the best possible protection against penetration of saltwater from winter snow and ice prevention activities.

Enviro-Grip™ 555 primer will bond with asphalt residue to allow quick installation when time constraints warrant fast turnaround. P-Tuff® BDM is able to resist early loading of ballast and pneumatic tire traffic almost immediately following membrane placement, ensuring fast turnaround and limited delays during construction. It meets and exceeds all requirements of AREMA guidelines for use on all railroad bridges. It can be used in direct contact with rock ballast without the need for protection board, reducing cost and installation time on railroad bridges. Also, unlike many other membrane systems, P-Tuff® BDM does not have an objectionable odor that could cause public concerns during installation.

P-Tuff® BDM outperforms torch-applied, hot mop, pre-form sheets and leading spray-applied products. P-Tuff® BDM is an easily installed spray on material that forms a tough, seamless-waterproofing membrane for highway and railroad bridge decks. This cold-applied elastomeric barrier provides longer bridge deck lifecycle performance and more ease of application than environmentally harmful non-spray membranes, such as torch-applied and hot mop products.
**1.09 PRIMING**
Prime surface as required with Enviro-Grip™ at a rate of 1 gallon/300 sqft or 300 sqft/gallon (0.14 liters/sqm). Apply using a brush or phenolic core roller. This will result in 3 dry mils (76 microns) of coating. Existing urethane coated surfaces should be primed with Enviro-Grip™ 555.

Rough and pinholed concrete surfaces may require more primer. Discovery of these issues is generally revealed in the mock-up. See the Tech-Note Section of the Poly-Tuff website. Do not allow primer to puddle, dry roll excess primer with a dry nap roller to pick up excess primer in puddles and overlaps.

**1.10 JOINTS, CRACKS, AND FLASHING**
Apply P-Tuff® BDM over all primed joints and cracks. Bridge the joints and cracks with 4" (10.16 cm) Super Seal Polyester Tape. Do not prime over Super Seal Tape. Over reinforcement tape apply a thin coat of P-Tuff® BDM and smooth onto adjacent surface. Optionally in lieu of 3 coursing laps and joints, Super Seal Tape may be used over all cleaned laps, joints and cracks and then coated. Fully reinforced systems do not require the use of Super Seal Tape over joints and cracks.

**1.11 MIXING**
P-Tuff® BDM may not be diluted under any circumstances. Use appropriate solvent for solvent purge line and flushing of equipment and if spraying stops for periods exceeding the pot life of the material. Thoroughly mix P-Tuff® BDM Side-B Base material with air driven power equipment until a homogeneous mixture and color is obtained. P-Tuff® BDM is spray-applied using suitable plural spray equipment at a 1:1 mix ratio.

**1.12 APPLICATION**
P-Tuff® BDM should be applied using a 1:1 plural component equipment capable of developing a minimum of 2000 psi and heating the individual component to 170°F (77°C) using an impingement gun. It is applied over the primer at a nominal 80 mils (2032 microns). Application of a second subsequent 30 to 40 mil (762-1016 microns) layer of membrane of primer shall be applied on highway bridge decks that have been determined to require an aggregate broadcast for shear-key purposes (#4 US Sieve crushed granite or basalt).

Hose temperature should be maintained at 160-170°F (71-77°C). The P-Tuff® BDM material should be preheated to 75-85°F (24-30°C). P-Tuff® BDM should be sprayed in multi directional passes for a proper uniform thickness.

- Recoat Time:
  - 0-6 hours
- Recommended Applied Thickness:
  - > 2 mm
- Return to Service: Foot Traffic:
  - 1-4 hours
- Return to Service: Full Service:
  - > 24 hours

**1.14 CLEAN UP**
Equipment should be cleaned with an environmentally safe, urethane grade solvent (alcohol free) as permitted under local regulations immediately after use.

**1.15 STORAGE AND SHELF LIFE**
P-Tuff® BDM has a shelf life of 12 months from date of manufacture in original, factory-sealed containers when stored indoors at a

### 1.16 LIMITATIONS

- Containers that have been opened must be used as soon as possible.
- Do not dilute P-Tuff® BDM.
- Mix no more material than can be used within 20 minutes.
- Not UV stable.
- P-Tuff® BDM is difficult to clean up after it has cured.
- Surfaces must be dry, clean, and free of foreign matter.

**WARNING:** This product contains epoxy resin and curatives.

### 1.17 CAUTION

Use with adequate ventilation. Wear protective clothing, gloves, and eye protection. (Goggles, Safety Glasses and/or Face Shield) Keep out of the reach of children. Do not take internally. In case of ingestion, seek medical help immediately. May cause skin irritation upon contact, especially if prolonged or repeated exposure. If skin contact occurs, wash immediately with soap and water and seek medical help as needed. If eye contact occurs, flush immediately with clean water and seek medical help as needed. Dispose of waste material in accordance with federal, state and local requirements. Cured resins are Innocuous. Dispose of waste material in accordance with federal, state and local requirements.

**READ SDS PRIOR TO USING PRODUCT. FOR PROFESSIONAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. MADE IN THE USA.**
Please read all information in the General & Safety Guidelines, Technical Data Sheets, Guide Specifications and Safety Data Sheets (SDS) before applying material. PSI Products are for “Professional Use Only” and preferably applied by professionals who have prior experience with the PSI Products or have undergone training in application of PSI Products. Published technical data and instructions are subject to change without notice. Contact your local PSI representative or visit our website for current technical data, instructions, and project specific recommendations.

LIMITED WARRANTY
PSI warrants its products to be free of manufacturing defects and that they will meet PSI current published physical and chemical properties. Seller’s sole responsibility shall be to replace that portion of the product which proves to be defective. There are no other warranties by PSI of any nature whatsoever expressed or implied, including any warranty of merchantability or fitness for a particular purpose in connection with this product. PSI shall not be liable for damages of any sort, including remote or consequential damages resulting from any claimed breach of any warranty whether expressed or implied. PSI shall not be responsible for use of this product in a manner to infringe on any patent held by others. In addition, no warranty or guarantee is being issued with respect to appearance, color, fading, chalking, staining, shrinkage, peeling, normal wear and tear or improper application by the applicator. Damage caused by abuse, neglect and lack of proper maintenance, acts of nature and/or physical movement of the substrate or structural defects are also excluded from the limited warranty. PSI reserves the right to conduct performance tests on any material claimed to be defective prior to any repairs by owner, general contractor, or applicator.

DISCLAIMER
All guidelines, recommendations, statements, and technical data contained herein are based on information and tests we believe to be reliable and correct, but accuracy and completeness of said tests are not guaranteed and are not to be construed as a warranty, either expressed or implied. It is the user’s responsibility to satisfy himself, by his own information and test, to determine suitability of the product for his own intended use, application and job situation and user assumes all risk and liability resulting from his use of the product. We do not suggest or guarantee that any hazard listed herein are the only ones which may exist. Neither seller nor manufacturer shall be liable to the buyer or any third person for any injury, loss or damage directly or indirectly resulting from use of, or inability to use, the product. Recommendations or statements, whether in writing or oral, other than those contained herein shall not be binding upon the manufacturer, unless in writing and signed by a corporate officer of the manufacturer. Technical and application information is provided for the purpose of establishing a general profile of the material and proper application procedures. Test performance results were obtained in a controlled environment and PSI makes no claim that these tests or any other tests, accurately represent all environments.
